Christalee Bieber
Brooklyn, NY

Homepage
Github

Summary: Flexible fullstack SaaS developer (Python, JavaScript), experienced in health tech, looking for my next mission-driven role. Open to hybrid (NYC) and remote positions.

Experience

Rula

10/24–3/26

Engineer II

- Revamped the patient onboarding funnel, simplifying the intake form from 2 pages to 2 fields with robust validation, geocoding, and graceful error handling, using NextJS (75+ weekly starts).
- Wrote React components and modified internal tools to implement a peer referral "gift-a-session" program, leading to 75+ weekly patient starts.
- Created an online tool to deliver real-time insurance estimates for prospective patients, replacing an email-based flow with a 48 hr. turnaround time (25+ weekly starts).
- Developed, deployed, and documented an internal library wrapping feature flag functionality to facilitate product analytics in 4 top-of-funnel services (Node/React).

Stellar Health

7/21–3/24

Engineer I (7/21–6/22), Engineer II

- Migrated the patient summary, a core page visited by 1000s of daily users, from Django/JQuery to React.
- Designed and implemented a printable patient summary, used by 60% of client offices (Django/React).
- Connected scheduling data to relevant action items, allowing bulk closure to save users ~10 clicks/action.

Recurse Center

1/21–3/21

Participant

- Scraped (2/5 data sources), cleaned, and visualized the cost of beer, coffee, and bread on a world map, using Python/pandas, Leaflet.JS, and Chart.JS. Feature-complete, tests and bugs TBD. ([Github](#), [Site](#))
- Revamped a PostgreSQL/Flask/React app for submitting compliments about fellow Recursers, including bugfixes, schema changes, and new UI components. ([Github](#))

Lewis Rhodes Labs

10/18–1/19

Consultant

- Adapted marketing materials from PowerPoint to a modern web format, using Django & Wagtail CMS to allow flexible page layouts, hosted on Google Cloud for secure client review.
- Wrote Python and JavaScript to consume and display realtime data from a hardware prototype via Redis.

Workshop School

9/13–6/16

Technology Coordinator

- Deployed and maintained 200+ Chromebooks, 50+ iMacs, and 25 Windows desktops for students in a project-based interdisciplinary CTE (Engineering & Automotive) high school.
- Spearheaded CS/tech education by teaching programming & web design; designing curriculum and teacher PD; mentoring student projects; advising the Computer Club; and organizing career exploration.

Education

Massachusetts Institute of Technology

Cambridge, MA

Bachelor of Science, Physics

Computer Science: Structure & Interpretation of Computer Programs; Circuits and Electronics; Signals and Systems; Computation Structures.
